Enhancements

Email Images Securely

There is a new Primary Menu button called "**Encrypt**" you can use to Encrypt any type of Windows files, including X-Rays and Oral Images, creating a password protected zip file suitable for emailing. Once you open the "**Encrypt Files**" screen, then use the top toolbar option "**Help Video**" to watch a short 5 ½ minute video to learn how to use this new feature.

Employee Time Clock

The New Time Clock has a new button "**Group Time Entry**" that lets you easily add Holiday Times for several Employees at once and/or Vacation Days much easier.

Perio Charting

The General Perio charting program has been greatly improved!
- By default, if a pocket depth is 4 or greater it will be highlighted in red.
  If you don't like this or would like to customize the trigger depth value used, there is a new "Options" button on the right you can use to set a custom depth.
- The new "Options" button on the right lets you customize a your chart display i.e. turn off the Line Coloring, control how the print screen Prints, set the pocket depth coloring trigger value, etc.
- The "Clear" button on the right is now called "Shift/Clear". It has a new green button you can use to shift visit lines.
