## **“Warning Dangerously Low on Shared Disk Space”** **- Message -**

You might receive this message when logging into EasyDent.  
It means one of 2 things.

- 1) If you get this message and EasyDent won't let you login then you might have lost the networking to your main shared drive.

You can try opening your “Computer” or “MyComputer” option from Windows and try to open your main shared drive. Sometimes this Re-connects your main shared drive.

Otherwise, call your hardware support to help you get re-connected.

- 2) You are potentially running low on free space on the shared drive where EasyDent's data folders reside.

In this case it's time to have your hardware support people evaluate your main storage drive and plan on upgrades and/or disk clean up.

In either case, your hardware support should be able to help you.
